

Announcement: Ecosystem Sciences Division

Fall 2009 ES Seminar Series:

**Ecosystem Sciences Seminar Series: an interdisciplinary perspective**

Wednesdays from 12-1 112A Hilgard

Come hear our ES Faculty, Students and Postdoctoral Researchers present their work!

<b>Date</b>	<b>Speaker</b>	<b>Title</b>
9-16	Tina Bell, Visiting Scholar, U. Melbourne	Up in smoke: forest fires in south-eastern Australia
9-23	Elena Ormeño Lafuente, ESPM Postdoc	Plant volatiles: their importance in ecology and atmospheric sciences.
10-7	Joe McBride	Re-establishment of war-torn urban forests
10-14	Paolo Gonthier Visiting Scholar ESPM	An unexpected collateral damage of war: the introduction of a tree pathogen in Europe during World War II
10-21	Matteo Garbelotto	Exotic pathogens/native trees and native pathogens/exotic trees: two underlying causes of forest epidemics
10-28	George Roderick	BIOCODE: all species inventory in Moorea. Update on the terrestrial invertebrates
11-4	Todd Osmundson Postdoc	Biocoding the fungi of Moorea
11-18	Siamak Khorram, visiting Professor	TBA
11-25	Maggi Kelly	Characterizing forest structure with lidar data in the Sierra Nevada Adaptive Management Project
12-2	Eoin Brodie, Staff Scientist, Earth Sciences Division at LBNL	Predicting the response of soil microbial communities to climate change
12-9	Gary Anderson, Staff Scientist, Earth Sciences Division at LBNL	A phylogenetic microarray approach to monitoring and source tracking coastal-zone pollution
